

GOOD IDEAS DO YOU TRUST YOUR BACKUPS?

Not all backups are created equal.

A good backup system helps you bounce back quickly. It keeps your operations running smoothly and ensures you don't lose valuable information.¹

IT is complicated. Knowing the right questions to ask can be difficult. When it comes to backups, here's a list of good ideas.

Ask your IT expert:

- Are we prepared for natural disasters?**
Like fire or flood by keeping an off-site backup?
- Are we protected from ransomware?**
With at least one backup stored offline or in the cloud?²
- Can we recover quickly from equipment failures?**
Via full image local backups without downloads or physical retrieval?
- Can we recover single files from accidental deletion?**
Without the disruption of a full system restore?
- Is our backup data encrypted to protect from theft?**
Making it more difficult to read?
- How often are our backups reviewed?**
To ensure errors are proactively addressed?
- How often are our backups tested?**
To ensure they work when needed?
